The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rosenbaum (US 4,326,750) in view of Ward (US 5,359,942).

Rosenbaum discloses a door operator for a bottom dumping vehicle. The system is comprised of a housing 136 supported by the vehicle and accommodates a double acting piston 132 that moves in a first direction and a second direction in and out of the housing 136 to open and close the door of the vehicle. The piston is operated by either compressed air or liquid and when the air or fluid is supplied or relieved the doors will open or close. A control assembly 152 operates in a first mode to and a second mode. The first mode maintains the doors in a closed position while the second mode maintains the doors in an open position. The control assembly 152 allows for a predetermined amount of air or fluid to be applied to the pistons 132 to move the doors from one position to another or to maintain the doors in either the open or closed positions. The control assembly 152 is connected to an air supply 154 by means of input ports 166 and conduits 168, 170. Two output ports 174, 176 establish communication between the control assembly 152 and the pistons 132.

Art Unit: 3617

Rosenbaum discloses the door actuator assembly as described above. However, Rosenbaum does not disclose the doors use on a railroad car. Ward discloses a railroad car with bottom dump doors. It would have been obvious to one of ordinary skill in the art to understand that a door assembly, like that of Rosenbaum could have been applied to a railroad car, like that of Ward since the two vehicles are substantially the same construction except for the mode of travel with which they are used.

Allowable Subject Matter

Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 8-17 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bounds (US Re. 36,685) and Friesen (US 6,416,133) both disclose types of vehicle door actuator assemblies.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J. McCarry, Jr. whose telephone number is (703) 305-0581. The examiner can normally be reached on Monday through Friday 8:00am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, S. Joseph Morano can be reached on (703) 308-0230. The fax phone
